

VESZÉLYEZTETETT ÁLLATOK – PROJEKTMUNKA ANGOLÓRÁN

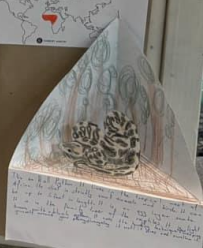

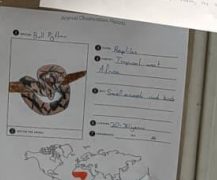

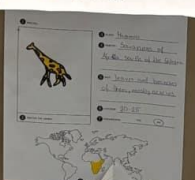

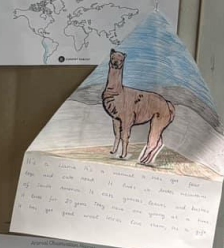

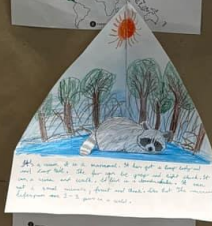

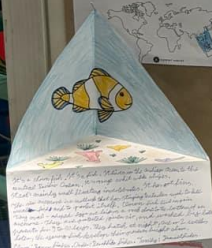

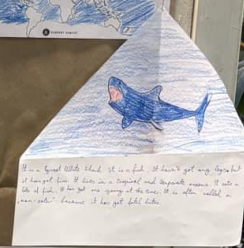

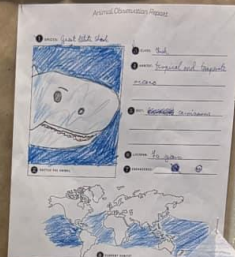

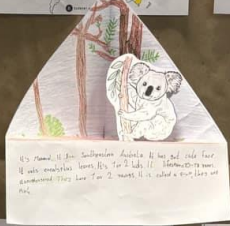

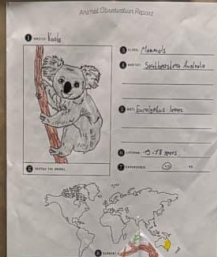

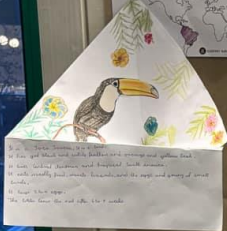

A 6.a és a 6.b osztály tanulói kreatív projekt munkákat készítettek, mely keretein belül a veszélyeztetett, és számukra különlegesnek tartott állatokról végezhettek kutatómunkát. A diákok válaszokat kerestek arra, milyen módszerek és megoldások állnak a rendelkezésünkre, arra, hogy ezeket az állatokat megmenthessük. A projekt során készültek triorámák, prezentációk és kreatív rajzok.
